SUMMARY

Computer Engineering student (B.Tech, CGPA 8.5+) with hands-on experience building and deploying full-stack web applications end to end — frontend, backend, database, and live deployment. Comfortable working across the MERN stack, with a track record of independently shipping multiple production-style projects covering fintech dashboards, secure messaging, automation tools, and personal finance apps.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C

Web Development: React.js, Node.js, Express.js, Tailwind CSS, Bootstrap

Database & Tools: MongoDB, MySQL, Git, GitHub,

PROJECTS

AI-Stock — Stock Recommendation Platform

- Built a stock recommendation platform for Indian equities powered by 20+ trading and investment strategies with live market data.
- Designed a dashboard that scans stocks, ranks buy signals, and displays price targets, risk levels, and strategy details.
- Implemented portfolio tracking and capital allocation logic to help beginners research stocks before investing.

Zero-Trace — Anonymous Chat Platform

- Built a secure anonymous chat platform with client-side encrypted messaging and no user registration required.
- Implemented shareable links/QR codes, password-protected rooms, self-deleting messages, and real-time WebRTC voice calls.
- Added typing indicators and admin controls, giving users a private way to communicate without exposing personal data.

Tracura — Personal Expense Tracker

- Built a personal expense tracking platform with secure authentication and customizable budgeting spaces.
- Implemented expense CRUD, budget progress indicators, analytics dashboards, and category-wise charts.
- Added CSV/PDF export and a responsive dark/light theme UI to help users understand and control spending habits.

EDUCATION

Drs. Kiran & Pallavi Patel Global University (KPGU)

B.Tech in Computer Engineering

CGPA: 8.5+

Expected 2027

CERTIFICATIONS

- Java & Python Programming Mastery — Udemy: core programming concepts, problem-solving, and practical coding.
- Green Skills & Artificial Intelligence — Skills4Future: sustainable practices and eco-friendly approaches to technology projects.
